**Engineered to keep
vessels moving.**

Exakt Propulsion and Hydraulics LLC

marinepropulsionparts.com

**We serve 100+ clients.
We serve every major
propulsion OEM.**

Our **supply network** is the single most important operational asset of the business. It covers the world's leading marine propulsion and hydraulics manufacturers, giving clients a single point of contact for parts and systems they would otherwise need to chase across continents and time zones.

Exakt Propulsion and Hydraulics was established to address a structural gap in the marine propulsion supply chain. Operators worldwide rely on a handful of major OEMs for propulsion-critical components, often facing long lead times, opaque pricing, and limited service depth outside the OEMs' core markets. For fleets operating across the Gulf, Indian Ocean, and global trade routes, this dependency translates directly into vessel downtime and lost revenue.

From its **Dubai headquarters**, Exakt operates as an independent, technically focused supplier. We source from a curated network of more than 100 partners that includes OEM authorised distributors, type-approved manufacturers, and specialist workshops. Every part we supply is compatible with OEM specifications. Every solution we deliver is reviewed by an engineer before it leaves our office.

Who we are.

Premium parts. Engineered support.

Marine propulsion specialists based in **Dubai, United Arab Emirates**

Mission & Vision

To keep **vessels moving** by delivering the right propulsion part, to the right port, in the shortest possible time, supported by engineering expertise at every step to become the most trusted independent propulsion and hydraulics partner in the **MENA** region and a recognised reference point for operators **worldwide** who refuse to accept unnecessary downtime.

What we do.

Exakt operates across four core capabilities, each backed by direct sourcing relationships, in-house engineering review, and end-to-end logistics from Dubai. Whether the requirement is a single replacement bearing or a complete CPP overhaul, the same standard applies.

- Propulsion Spare Parts
- Hydraulic Systems
- Propulsion Control Panels
- Stern Tube Services
- Seal Bonding
- 24/7 Technical Support

By the numbers.

Our service model is built around speed and technical depth. Most enquiries get a substantive response within hours, most quotations within 48 hours, and almost every order is shipped within days of confirmation. These are the proof points operators ask about first.

Same-day quote response 85%

Orders shipped within 7 days 92%

Repeat client rate 78%

What we do

Three things, done properly.

|

Propulsion parts

Premium spares for main engines, thrusters, and shaft lines. OEM-compatible and type-approved.

Hydraulic systems

Power packs, CPP systems, steering gear, and pump overhauls. Built and tested to OEM specifications.

24/7 support

Emergency mobilisation, remote diagnostics, and engineer-led troubleshooting, anywhere in the world.

9 / 20

Built for fleets that can't afford downtime.

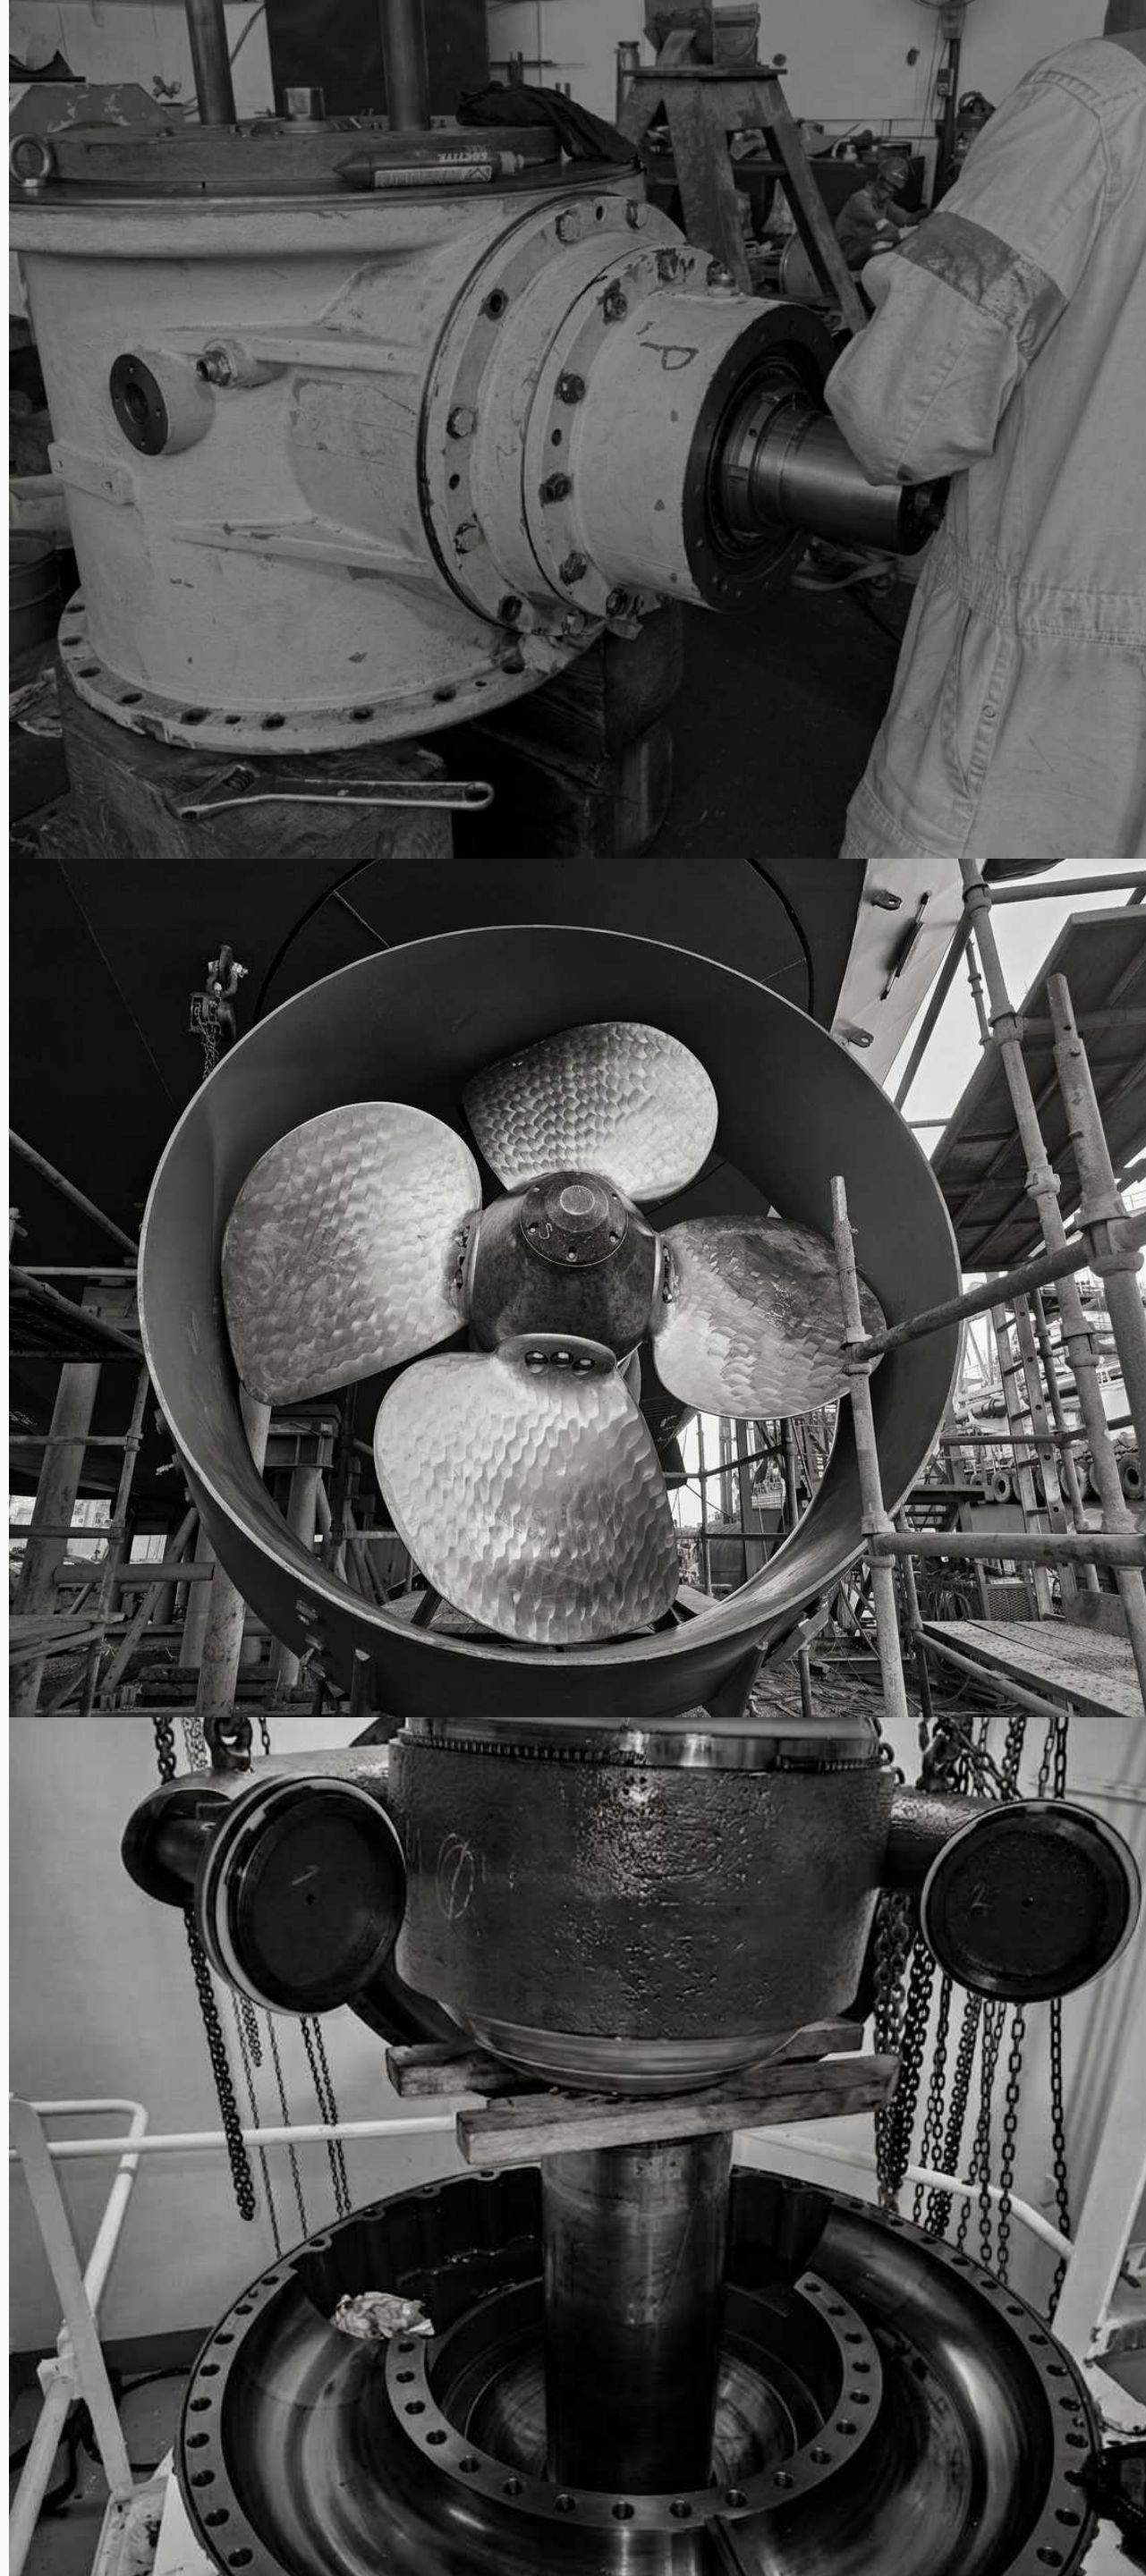

Marine **downtime** is the most **expensive problem** operators don't budget for. Every day a vessel sits idle is revenue lost and charter exposure compounded. Exakt was built specifically to close that gap with faster sourcing, transparent pricing, and engineering review on every order.

100+
Global supply partners

24/7
Technical response

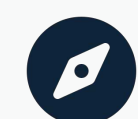

Engine spares

Premium spare parts for main engines and auxiliary engines. OEM-compatible, fully traceable, ready for dispatch.

Hydraulic overhauls

Hydraulic pumps, power packs, and steering gear. New units or service-exchange overhauls, pressure-tested to spec.

Control systems

Bridge-to-propeller control systems for new builds and retrofits. Integration support included.

11 / 20

Why operators stay with us.

Most of our clients stay for years and many bring their wider fleet with them. The reason is simple: we treat propulsion as the engineering problem it is, not as a transactional sale. Every order is reviewed by an engineer before it leaves the office.

Speed over bureaucracy

Direct sourcing, short quotation cycles, expedited freight from Dubai. Hours, not weeks.

Type-approved quality

Compatible with Wärtsilä, Rolls-Royce, ZF, Shuttle, Kawasaki, SKF, IHC, and the other major OEMs.

Engineer-led service

Every quote is reviewed by an engineer. Technical advice is included at no extra cost.

1

You send the part

Send a part number, vessel ID, or technical description. We respond within hours.

2

We quote and validate

Engineer-verified part match, transparent pricing, clear delivery timeline.

3

We source and ship

Direct supply from the partner network, expedited freight, full logistics handled end-to-end.

One technical contact, not a call queue.

24/7

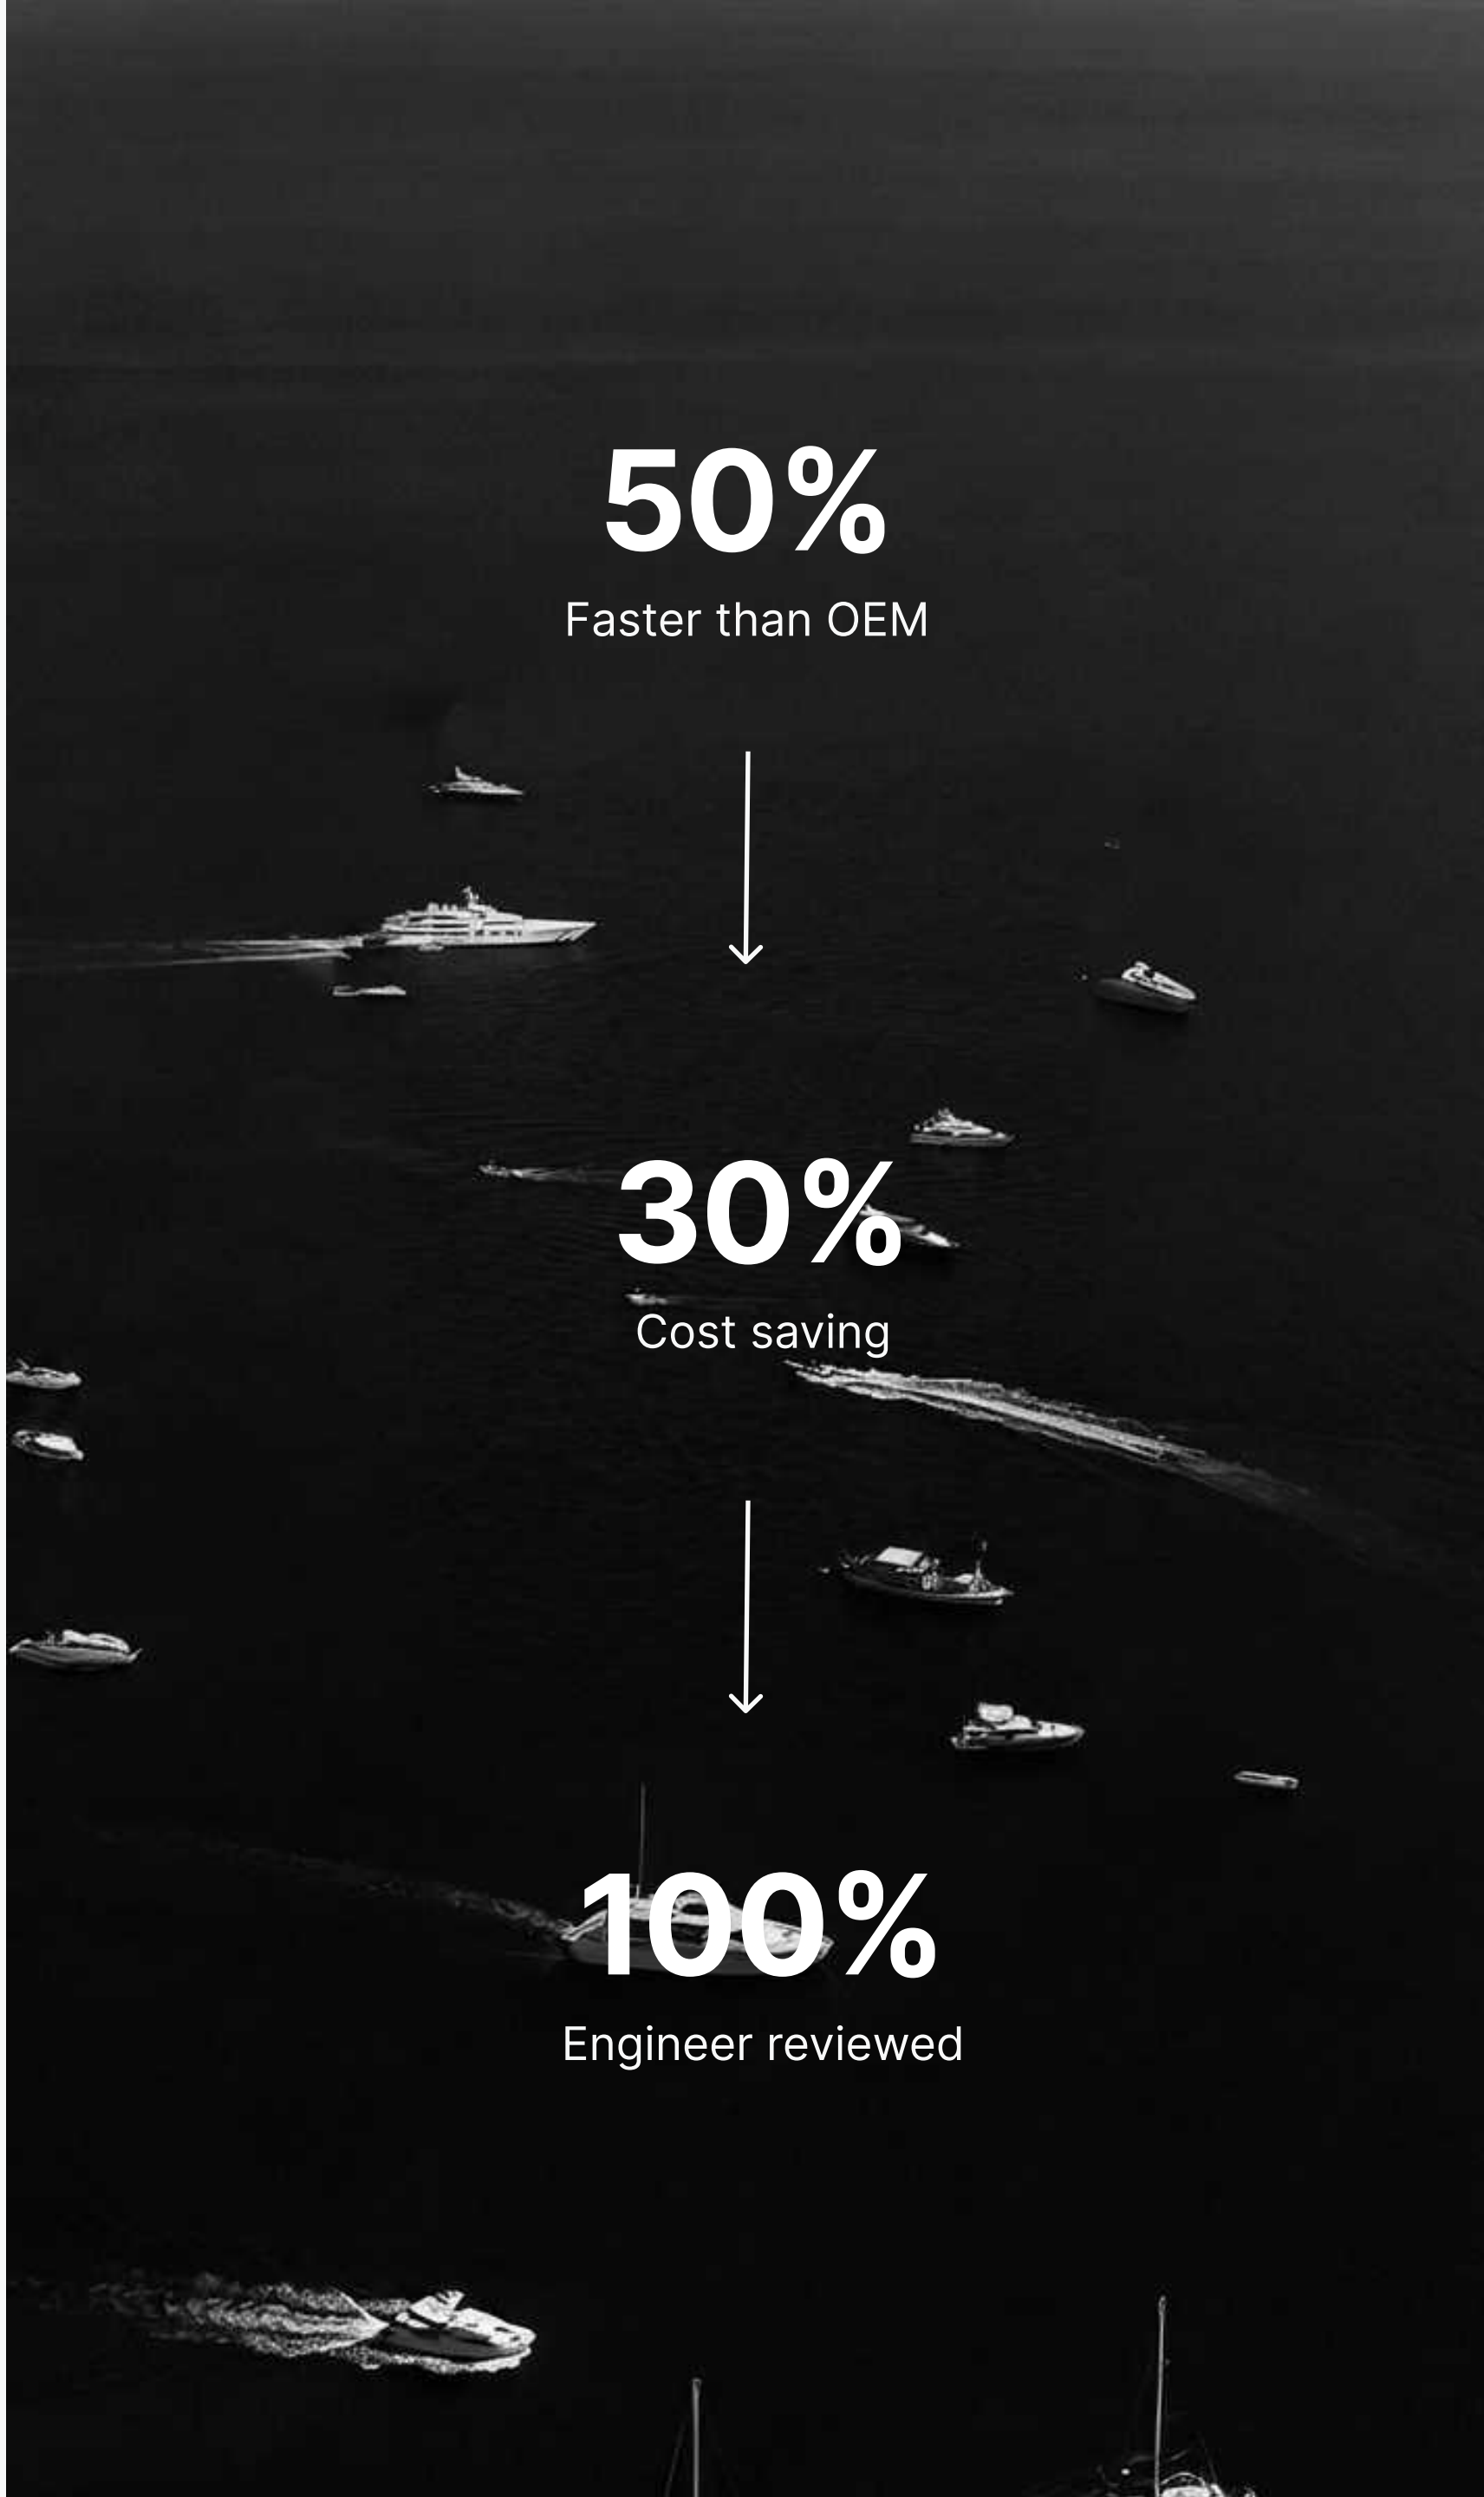

Direct line to the engineer

When you call, you get an engineer who knows your system. No routing, no script, no wait.

Better speed. Better price. Better outcome.

The OEM channel is slow, expensive, and geographically uneven. Exakt's model is built to compress every step. Direct sourcing, transparent pricing, and engineer-led validation deliver the same technical quality at a lower total cost and in a fraction of the time.

14 / 20

Industries we serve.

From **global commercial** fleets to coast guards and luxury yachts, our client base shares one priority: keep the vessel running.

Commercial shipping 30%

Offshore and energy 60%

Tugs and workboats 95%

6
Sectors served

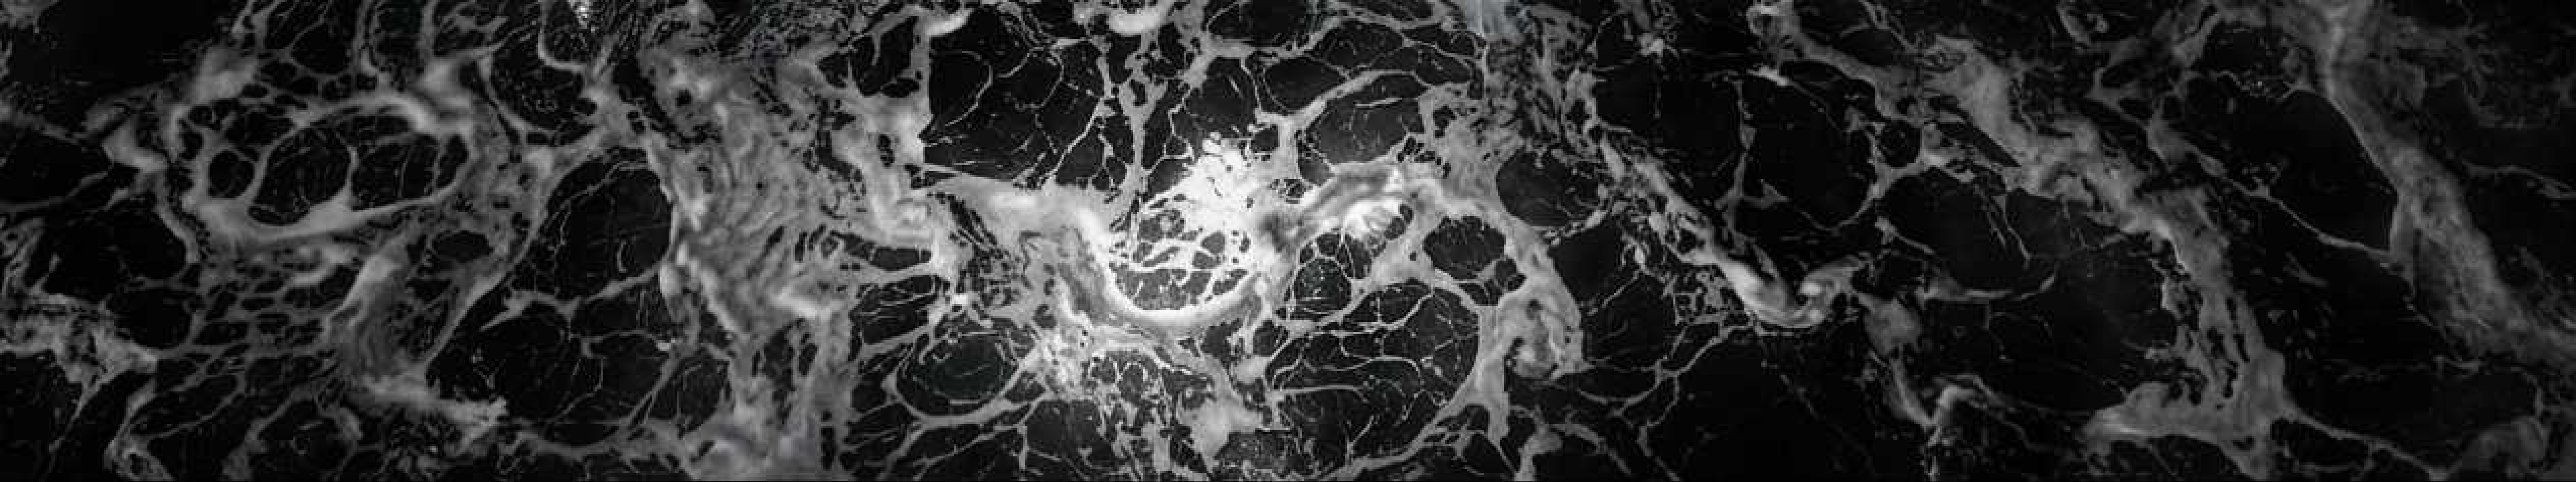

**Most failures
are predictable.
Most delays
are not.**

The Exakt mandate

Our **job** is to **make sure** unpredictable **delays stop** costing you predictable revenue.

|

Where Exakt outperforms OEM.

Independent benchmarks against OEM channels are simple to run: lead time and total landed cost. On both dimensions, Exakt clients consistently see meaningful improvements. The technical specification does not change. The speed and the price do.

18 / 20

**Reach us the
moment you
need us.**

Phone, email, WhatsApp, or marinepropulsionparts.com. Our team is set up to receive your enquiry through whichever channel is fastest for you, and to respond within hours.

Asia and Indian Ocean

Established freight routes to Singapore, Mumbai, Colombo, and the wider Far East. Express courier and air freight options for time-critical parts. Coordinated dispatch to vessels in transit and to client shipyards across the region.

Europe and the Americas

Forwarded supply through our global partner network, with delivery coordinated to the client's preferred port or yard. Wherever your fleet trades, our supply network reaches.

**Dubai as the
launchpad. Every
ocean as the
destination.**
